1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kate Pauley on 27 June 2005. Applicant agreed to amend claim 22 to refer to "subcutaneous fat thickness" as was done in the amendment to claim 1 presented in the preliminary amendment filed 8 June 2005. The claims will be amended to recite "adapted to be arranged" in three additional locations.

The application has been amended as follows:

In claim 22, line 6, -- adapted to be -- was inserted before "arranged";

line 10, "quantity" was changed to -- thickness --.

In claim 30, line 7, -- adapted to be -- was inserted before "arranged".

In claim 32, line 8, -- adapted to be -- was inserted before "arranged".

2. The following is an examiner's statement of reasons for allowance: Applicant cites several references related to measurement of body fat that include measurement of a voltage generated when a current is pass through different body portions. Of particular relevance, USPN 5,335,667, GB 2 160 323, and JP 2000-175875 disclose circumferentially arranged electrodes for impedance measurement of body fat. However, none of the prior art teaches or suggests a method or apparatus for computing fat quantities including any of the following, in combination with the other

Art Unit: 3736

claimed steps or elements: use of a measured value to determine a subcutaneous fat thickness; correction of a first voltage (measured between two closely spaced, circumferentially located electrodes) by a second voltage (measured with current passed substantially crossing the subject), with computation of a subcutaneous fat quantity based on the corrected voltage; computation of a fat quantity based on a measured spatial potential gradient; computing a ratio of a cross-sectional area of body fat to a cross-sectional area of the subject; multiplying a measured voltage by a power (related to size of the subject) and computing a fat quantity based on the product; or determining a visceral fat quantity based on measured first and second voltages.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric F. Winakur whose telephone number is 571/272-4736. The examiner can normally be reached on M-Th, 7:30-5; alternate Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on 571/272-4726. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
